Health Edit

Explore food and drink alternatives from a photo, with nutritional context and practical ideas for changing the foods you already enjoy.

For: People exploring everyday food choices, dietitians, wellness educators and community programs.

A practical example

Someone photographs a familiar snack or drink and explores possible alternatives that fit their preferences and available preparation time.

What you can explore

Photo-based food and drink exploration

Alternative ideas with simple explanations

Preferences and a saved library of swaps

Photo-based nutrition information is an estimate. Ingredient and allergen information must be checked against labels and appropriate professional guidance.
